

LibTyposAlphabeticalPlus

Compiled by Tina Gunther from activity on the LibTypos-L discussion group.

This alphabetical list merges the main LibTypos list with the MoreTypos list for the first time. The Moretypos entries consist of sets of words separated by a slash (i.e. United / Untied). We have to have found at least one of each set confused with another in OhioLINK for that set to be added to the list. Some entries may merit further investigation. Comments and suggestions are welcome. For more information see <<http://www.terryballard.org/typos/typoscomplete.html>>
